

User Acceptance Test Cases:

Action:	Input:	Expected Output:
Turning on sensor	User turns on the sensor from the GUI	The sensor turns on
Turning off the sensor	User turns off the sensor from the GUI	The sensor turns off
Viewing weather forecast		GUI displays a weather forecast
Check sensor status		GUI displays the sensor status
View weather readings		GUI displays the weather readings

The user is entirely interested in the use case functionality performing.

The end user does not need to know how the components communicate to appreciate the final result.
